

1 FACE DOWN

Place the side with the draw cord circle face down.

2 FOLD SIDES

First, fold the top side with handles down. Then fold the other sides in until you see the stitch line of the circle.

3 PULL & STUFF

Begin to pull the cord. With the other hand, stuff the body into the circle as it gathers and pulls up into a sack form.

4 LOCK & GO

Push cord stop down to lock. **To decompress,** pull cord stop all the way to end of cord and the product will unfold.
